## PLANKS STATION

CREATOR  
WINGÅRDHS DESIGN: DAVID REGESTAM

Planks is a fusion between classic designs, modern functionality and massive natural wood. The combination brings a homely feeling of calm.

## FORM

- Inspired by the classic “Shaker” table. A classic, strict and functional expression that will always be relevant.
- With an appearance and choice of materials that contribute to a soft feeling of home.
- Solid wood details make it possible to make your own unique mark through different types of surface treatment.

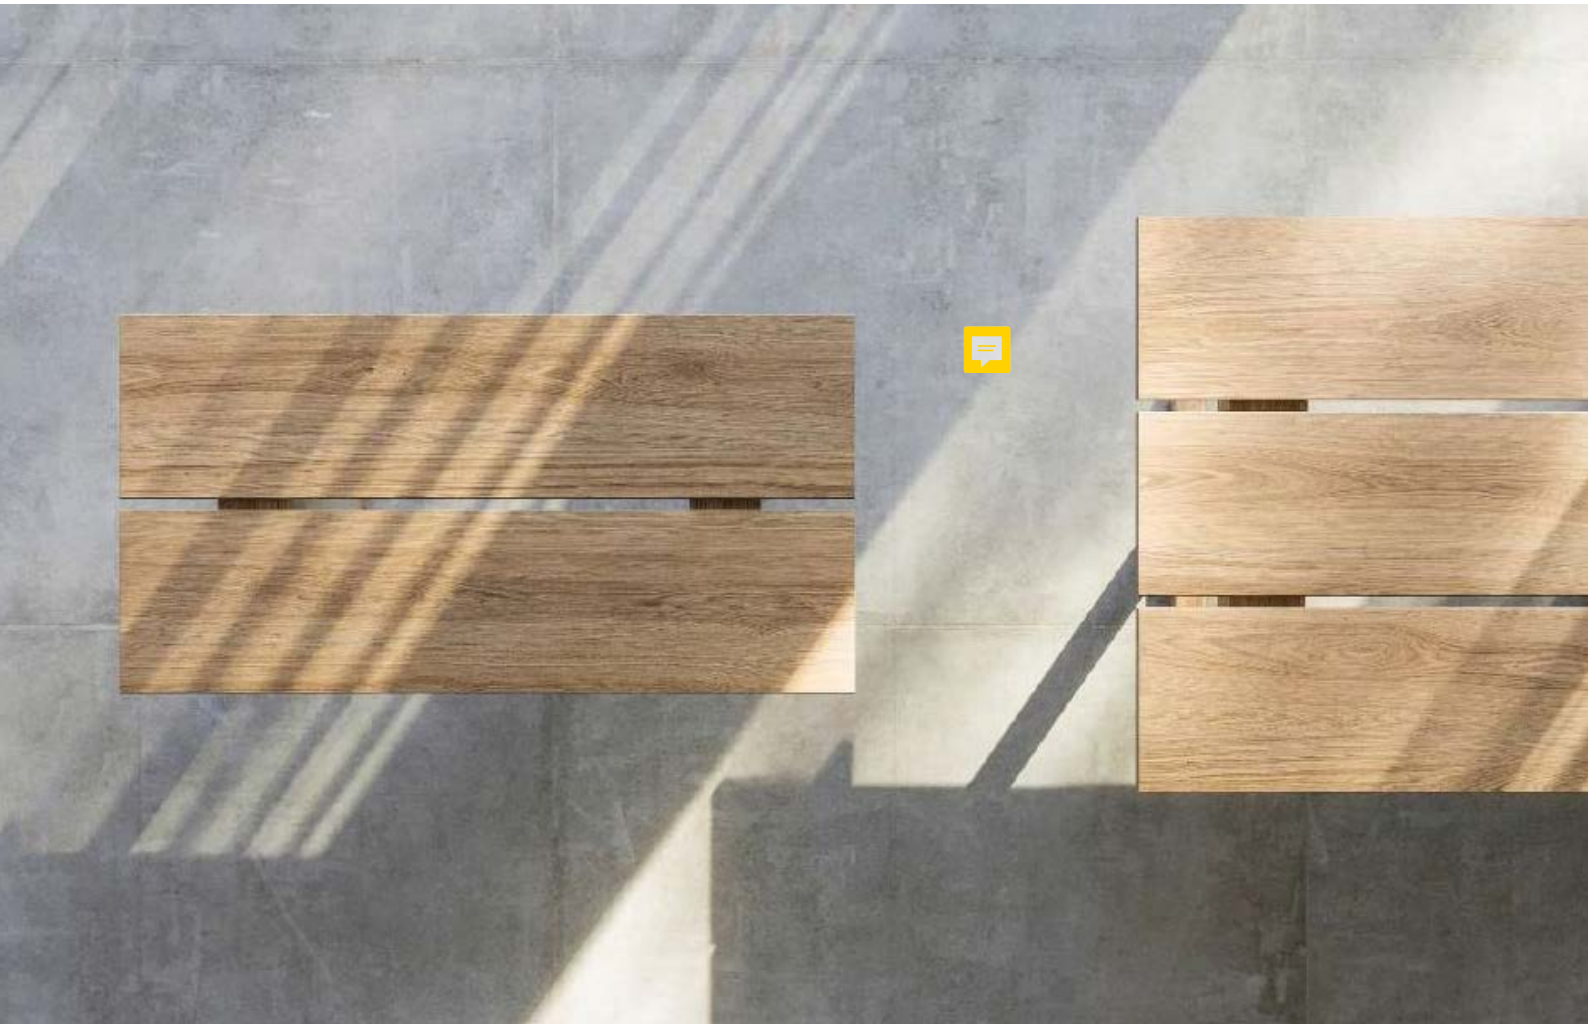

## FUNCTION

- Contributes to a more active- and dynamic work-environment since the desk is electrical height adjustable.
- Electrical cables are handled in a natural and neat way through the gap between the planks.
- Concealed electrical outlets have been angled up and moved forward under the table top for easy access.
- Electrically height-adjustable (620-1270 mm) with long stroke to fit both tall and short.

## SUSTAINABILITY

- All possible parts of steel have been replaced by solid wood. The ability to easily adjust the height gives the table flexibility to be reused in new ways in new environments.
- Solid wood treated with hard wax oil, which can easily be re-treated, means significantly extended product life-cycle.
- With a classic design-language that will always be appealing.
- PVC Free electronics.
- Max 0.1W, when the table is not in use. (Feel free to compare it with all alternatives)
- Control Unit with "Blue Tooth"

## FORM

- Inspired by the classic “Shaker” table. A classic, strict and functional expression that will always be relevant.
- With an appearance and choice of materials that contribute to a soft feeling of home.
- Solid wood details make it possible to make your own unique mark through different types of surface treatment.
- Creates a harmonious and uniform environment where workstations and meeting tables are united in the same design language.
- Meeting tables with a calm design that harmonizes with different types of seating furniture such as work chairs, bar stools or lounge furniture.

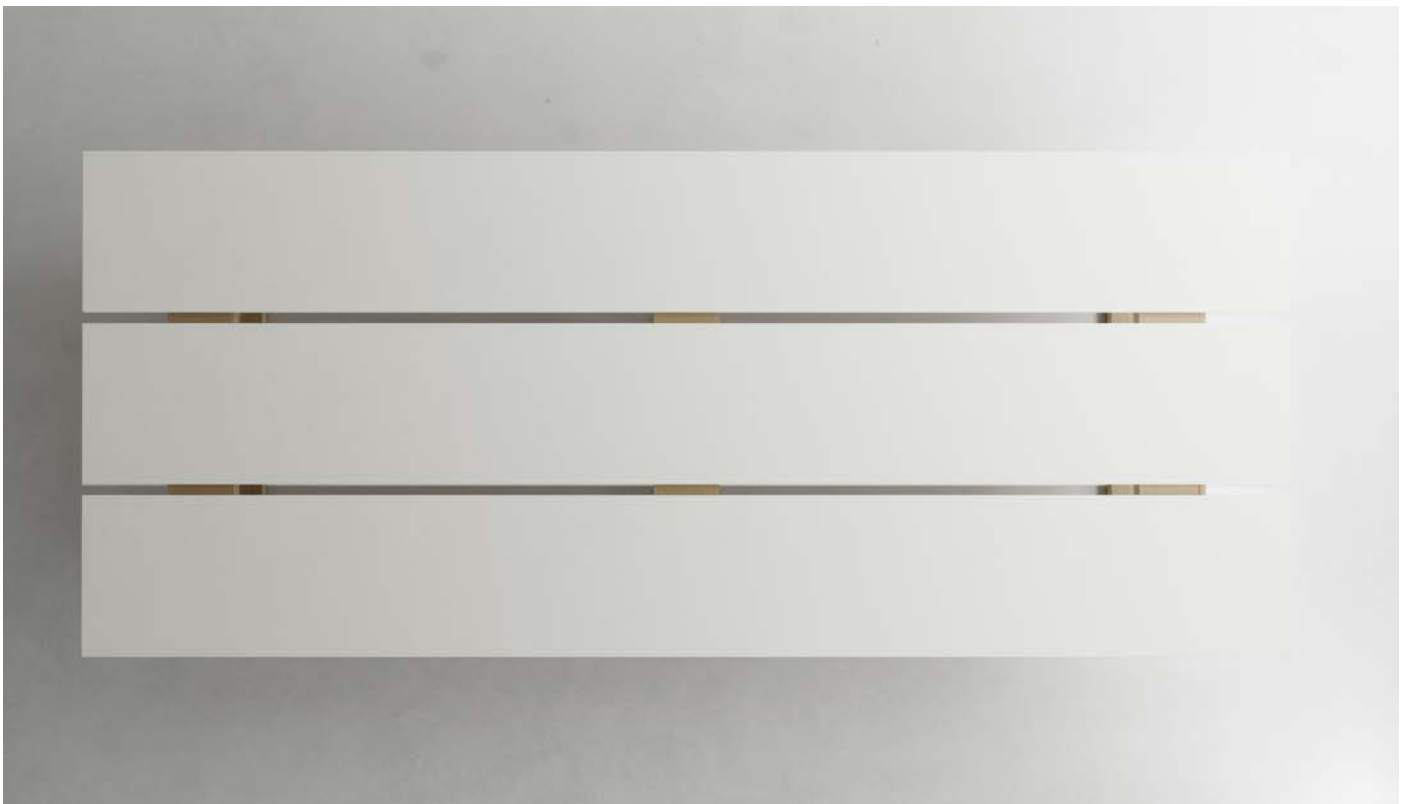

## FUNCTION

- Contributes to more active- and dynamic meetings since the desk is electrical height adjustable.
- Electrical cables are handled in a natural and neat way through the gap between the planks.
- Concealed electrical outlets have been angled up and moved forward under the table top for easy access.
- Electrically height-adjustable (600-1050mm) with long stroke to fit both tall and short.

## SUSTAINABILITY

- All possible parts of steel have been replaced by solid wood.
- Solid wood treated with hard wax oil, which can easily be re-treated, means significantly extended product life-cycle.
- With a classic design-language that will always be appealing.
- PVC Free electronics.
- Max 0.1W, when the table is not in use. (Feel free to compare it with all alternatives)
- Control Unit with "Blue Tooth"

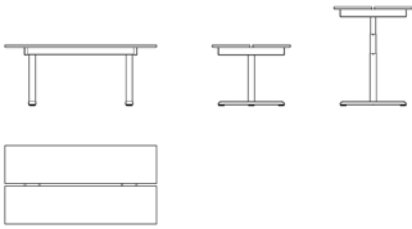

## DESCRIPTION

### PLANKS STATION

## DIMENSIONS

W=825mm

L= 1400, 1600, 1800, 2000mm

## SURFACES

### TABLE TOP AND EDGES
